Drive Holistic Cloud Transformation with LTIMindtree's Enclose Framework

Introduction

Today, accelerated digital transformation has pushed global enterprises to restructure and reimagine their business value chains. Usually, enterprises opt for JD Edwards, a reputable ERP software, due to its maturity, stability, user acceptance, seamless integration with third-party software, and other advantageous features. However, due to a lack of agility, performance issues, adaptability, and scalability, more businesses today are opting for Oracle Cloud. Hence, there is a need for a technology partner to help enterprises reimagine, refine, and remediate their cloud journeys.

Business Problems

Challenges with legacy systems:

Difficulties with cost management

Delays in business operation

Disharmony from operational disparate processes

Complex system management and maintenance

Issues related to troubleshooting

Challenges related to user support

Non-scalability

Non-compliance with standard parameters

Diverse skills required for problem-solving

Disparate processes and legacy systems have complex landscapes, process customizations, and diverse Enterprise Resource Planning (ERP) instances. These challenges lead to inaccurate and inconsistent data, stemming from multiple sources of truth, ultimately hampering business growth.

Enterprise growth is further affected by the following:

Delays in launching new products/features

Limitations in automation capabilities

Data inaccuracies

The inability to adopt next-gen technologies

LTIMindtree Solution

LTIMindtree's Enclave Framework helps enterprises accelerate innovation, respond to market dynamics, and realize the full potential of Oracle Cloud. By driving holistic transformation, we help improve the implementation timelines, thus remediating past implementations and delivering predictable returns.

Enclave – Methodology

Scaled agile approach, driven by best practices, designed for Oracle Cloud applications

Enclave – Content

Plug-n-play solution content for verticalized reports, integrations, and other Report Integration Customization Enhancement (RICE) elements

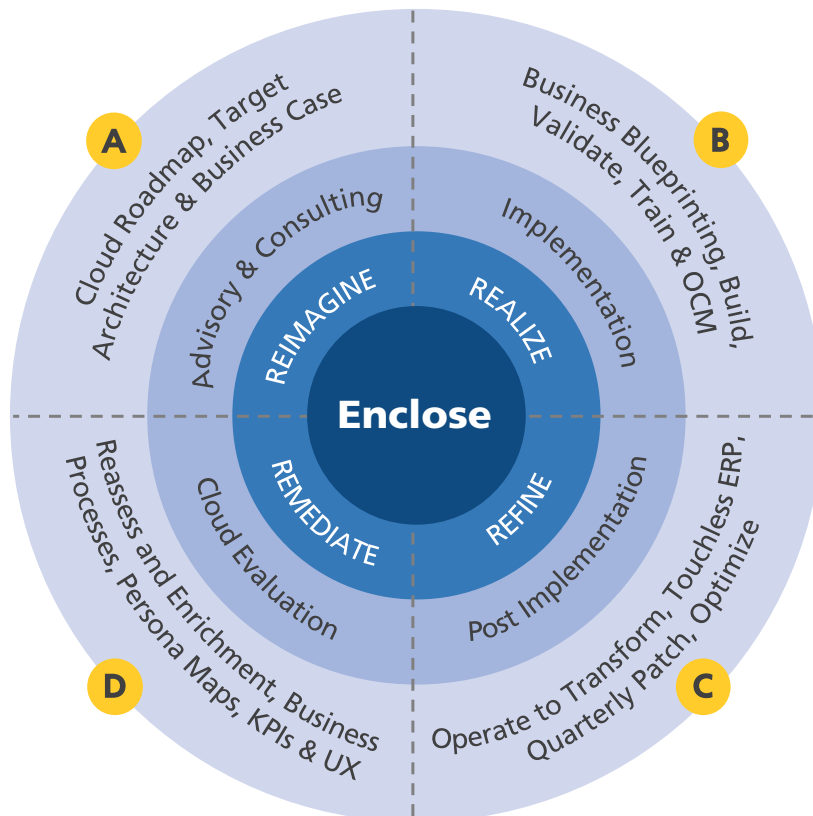

Enclose – Library

Purpose-built and curated library of process blueprints, data models, and other design assets for Oracle Certified Associate (OCA)

Enclose – Tools

Design to automate or accelerate manual activities

Benefits

Automated assessment includes programmed discovery, fitment, and value analysis

Reference solution architecture available for each JDE to SaaS module mapping

Comprehensive framework with more than 20 inbuilt tools and solutions across the build, migrate, test, and deploy phases

Pre-built templates aid in process/ data mapping, change analysis, and more

Extensive reusable solution library across integrations and customizations

Incorporation of RPAs and bots that enhance operational efficiency, especially in finance and supply chain domains

Why LTIMindtree?

LTIMindtree stands out as a trusted advisor to our clients with the largest JDE practice and cloud credentials. Our pre-built JDE to SaaS modules map is designed to align with specific industry architectures. They play a crucial role in the implementation and support of our Rely™ platform for end-to-end test automation. Additionally, our extensive library of reusable solutions covers integrations and customizations.

Conclusion

LTIMindtree embraces the limitless possibilities of technology with a range of comprehensive services and solutions that help empower your business to thrive in this digital age. Our expertise in deep industry domains and unmatched functional expertise are key to our ability to deliver agile outcomes. With an extensive portfolio for Oracle, we are committed to helping businesses reimagine their business processes.
